

EUROMEDLAB NEWS

What is Euromedlab News?

Euromedlab News

is issued periodically to report on developments in scientific programme and organisation of the Congress.

Euromedlab News

is a handy tool to get in touch with Milano and the forthcoming Congress in real time.

Euromedlab News

will be sent to IFCC National Representatives, to all Officers involved in IFCC, or EFLM, to IFCC Corporate Members, to other companies, and to anyone who has shown interest in the Congress;

Euromedlab News

may be freely quoted in journals or newsletters and even photocopied, provided the editor (Euromedlab Milano 2013 Organising Secretariat, Milan, Italy) is mentioned.

The complete scientific programme of the congress is now on-line!

We are pleased to inform you that the scientific programme is now ready and includes:

PLENARY LECTURES

These lectures, presented by leading scientists, will bring the audience up to date with the latest advances in basic and clinical research. The four Plenary Lectures are scheduled mid-morning (from 11.45 to 12.30), to give more delegates the opportunity to attend.

SYMPOSIA

These cover a number of fundamental topics of laboratory medicine. The 17 Symposia, organised by the Scientific Programme Committee, include three invited lectures and two brief presentations selected from among submitted abstracts.

POSTERS

The programme allows plenty of time to visit the poster exhibition. Several "poster walks" (guided tours of the most relevant posters) will be organised. Some of the posters will be chosen for oral presentations in the Symposia

EDUCATIONAL WORKSHOPS

This is a real innovation at this Congress. These workshops are proposed by the diagnostic industry and organised with their indispensable support but are thoroughly reviewed by the Scientific Programme Committee, in order to assure the proper harmonisation with the rest of the Scientific Programme thus becoming an integral part of the congress.

SATELLITE MEETINGS

Seven Satellite Meetings will be organised before and after the main congress, in collaboration with other Scientific Societies, from both Italy and elsewhere in Europe.

Spring in Milano

During spring, beautiful flower displays transform Milan's historical Naviglio Grande into a carnival of fragrances and colours. The annual flower and gardening show attracts cultivators and retailers from all over the country. Exhibitors take great pride in decorating and arranging their stalls to the greatest effect, so stroll around and peruse them all at your leisure, as this is a great chance to take a break from the hectic rhythm of bustling Milan.

The climate in Milan is typically Mediterranean, with high temperatures and sunny days in the summer and colder, damper weather in the winter.

Spring does come early and May is usually sunny with the most pleasant temperatures of the year.

May	Average min. Temp.	11.2 °C
	Average max. Temp.	21.9 °C
	Monthly Rainfall	96.5 mm

However, rainy days are not unusual in May, so do not forget to bring your raincoat!

**MUSEO NAZIONALE
DELLA SCIENZA E DELLA TECNOLOGIA
LEONARDO DA VINCI**

Founded in 1953, this is the largest science and technology museum in Italy.

The museum is housed in an early sixteenth-century Olivetan monastery, located in centre of Milano, and named after Leonardo da Vinci, the Renaissance intellect who mastered art, science and technology. Through the years, the Museum has collected objects, machinery and evidence that retrace the key phases of Italy's scientific and technological development.

The Museum includes the Leonardo Gallery, which hosts a rich selection of models created by a group of engineers who based their work on the study and interpretation of Leonardo's manuscripts.

The airscrew: Leonardo anticipates by centuries the application of the propulsion power of the helix. The screw is five metres in diameter, made of reed, linen, cloth, and wire.

**The museum will be the location for the
Speakers' Reception on Monday, 20 May 2013**
